

COYOTE SHAKER

WHAT YOU NEED:

- A soda can
- up to 15 pennies or small stones
- Aluminum foil
- Duct tape

HOW TO:

1. Put the pennies and/or stones in the soda can.
2. Put duct tape over the opening of the soda can.
3. Cut foil and tape it all around the soda can.

When a coyote is near you, shake the can vigorously and the sound of the pennies and stones smacking within the aluminum-wrapped soda can should help to frighten coyotes away.

You can also wave your arms around and even clap your hands.
